Fugo - Aie CD. Musically complex melodic songs with heavy guitars.

I'm undecided about this release. One minute it sounds like a concoction of sound that lacks continuity, the next it sounds really complex with heavy anthems and a pinch of teenage angst.

If you don't like listening to a record time and time again to understand the complexity of it, then this isn't the album for you. However, if you're the opposite you may just like it. The complex changes within each song are intelligent, but not necessarily that great. It takes a lot of musical talent to make a record - in this case it's intelligence over a good sound.

For Fugo this is their first album and they have plenty of time and it seems from this album creativity to create better things, which they are more than capable of in the near future. Give yourselves a pat on the back guys
